

# Swipe Sensor Vs. Area Sensor

The Bio SwipeDrive is currently the first Swipe Sensor based USB storage and authentication device available in the market today! While it offers a lot more than any product out there, it maintains its low cost while providing clear and present advantages over all other products in its categories. In the table below, we highlight some of the advantages..

Feature	Area Sensor	Swipe Sensor
<b>Security:</b>	Fingerprint latent can be retrieved from sensor surface <b>X</b>	Fingerprint latent can <b>NOT</b> be retrieved from sensor surface <b>✓</b>
<b>Reliability:</b>	Fingerprint minutia points scanned 200-400 <b>X</b>	Fingerprint minutia points scanned 500 <b>✓</b>
<b>Robustness:</b>	Bigger scan surface increasing chances for sensor damage while offering no extra benefit <b>X</b>	Smaller scan surface decreasing chances for sensor damage while offering better scan ratio <b>✓</b>
<b>Usability:</b>	Can not be interchanged with others without manufacture intervention <b>X</b>	Can be interchanged with others without manufacture intervention <b>✓</b>
<b>Cost:</b>		Lower or same as area sensor <b>✓</b>
<b>Overall better choice:</b>	<b>X</b>	<b>✓</b>
